# READ ME FIRST

## For use with Compatible W1480 with Limited Function Chip solution

This version of the compatible toner cartridge with a limited function chip will not provide the user with toner level and page yield information.
Updating your printer firmware version or accepting new firmware update notifications from the OEM HP may stop you from using compatible cartridges. Turning off the automatic update setting on your printer and click " **No**" when receiving a new firmware update notification is the best way to protect your cartridges from any future firmware update issue. Please follow the below instruction to disable auto firmware update.

Single-function Printer:

1. When install the cartridge for the first time, the printer will display above message. Press the "**OK**" button to contine.

2. The printer will display "**Ready**" with . This will not affect your print activities.

3. When requesting printing from a PC, it will prompt above message on the PC screen.

Click "**Snooze**" and slect "**2 Months**" to disable the message for a selected period. Repeat the process every 2 months to disable the message.

Muti-function Printer:

1. When install the cartridge for the first time, your printer will display above message. Press the "**OK**" button to contine.

2. The printer will display on. This will not affect your print activities.

3. When requesting printing from a PC, it will prompt above message on the PC screen.

Click "**Snooze**" and slect "**2 Months**" to disable the message for a selected period. Repeat the process every 2 months to disable the message.

Please replace the toner cartridge when the prints start to turn light or fade.

Instruction for disabling auto firmware upgrade

Updating your printer firmware version or accepting new firmware update notifications from the OEM HP may stop you from using compatible cartridges.
